

Dataset: Monthly Sales (in \$1,000s) for 4 Products Over 6 Months

Month	Product A	Product B	Product C	Product D
Jan	12	8	15	5
Feb	15	10	18	7
Mar	14	9	16	6
Apr	18	12	20	8
May	20	14	22	10
Jun	22	15	25	11

Graph: Line Plot of Monthly Sales Trends by Product

Let me generate that graph now.

Insights:

- Top Performer:** Product C consistently has the highest sales, showing strong and steady growth from January to June.
- Strong Growth:** Product A shows the second-best performance, with a noticeable increase, especially after March.
- Steady Climb:** Product B grows steadily but at a slower rate compared to A and C.
- Lowest Sales:** Product D remains the lowest-selling item but is improving gradually each month.
